

IMPORTANT SUSTAINABILITY & PERMACULTURE DATES OF THE YEAR

There are certain dates throughout the year that observe important elements of the foundational permaculture ethics; *Earth Care, People Care and Fair Share*. These are fabulous days to deliver focussed education on topics that help people understand challenges facing our global community, and to equip them with strategies and resources to make positive change.

Many of these dates stay the same every year, but others change slightly from one year to the next as they fall on the “last Saturday”, or during “the first week starting on a Monday” of a month. This can make it difficult to keep on top of your calendar, especially when you’re planning in advance.

To help you navigate this more easily and confidently, listed below are important environmental and sustainability dates for each month, with an indication as to whether they change or remain the same each year.

Dates marked in **GREEN** remain the same every year. Dates marked with **BLUE** change from year to year.

Events marked with ****asterisks** are specific to Australia

January

26th - **International Day of Clean Energy**

February

All month - ****National Sustainable Living Festival**

2nd - **World Wetlands Day**

March:
